## HIV in Orlando

### HIV Landscape

According to the U.S. Centers for Disease Control and Prevention (CDC), there are more than 103,696 people living with an HIV diagnosis in Florida. Below is a snapshot of the epidemic in Orlando:

- People living with HIV in Orlando (2014): 11,040
- New HIV diagnoses in Florida (2015): 4,849
- New HIV diagnoses in Orlando (2015): 580
- 73% of people living with an HIV diagnosis in Orlando in 2014 were men, 27% were women
- 39% of people living with an HIV diagnosis in Orlando in 2014 were black, 27% Hispanic/Latino, and 32% white
- In 2014, 68.9% of Orlando-area HIV cases in men were from male-to-male sexual contact, 8.2% were from injection drug use, and 4.8% were from injection drug use and male to male sexual contact
- In 2014, 69.6% of Orlando-area HIV cases in women were from heterosexual contact, and 13.6% were from injection drug use

**Rates of Black & White Persons Living with an HIV Diagnosis, by County, Orlando, 2015**

### The Importance of HIV Testing

The U.S. Centers for Disease Control and Prevention (CDC) estimates that more than 1.1 million people in the United States are living with HIV, yet nearly 1 in 7 people living with HIV are unaware of their status. In the United States, the Black community bears the greatest burden of the HIV epidemic, more than any other racial or ethnic group. While African Americans represent just 12% of the total population, they account for 41% of all people living with HIV and 44% of all new infections.

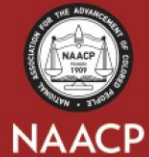

Experts recommend voluntary, opt-out routine HIV screening in health-care settings for all adults, and repeat screening at least annually for those at high risk. Pregnant women and newborns whose mother’s HIV status is unknown should also be tested.

The U.S. Preventive Services Task Force gives a “Grade A” recommendation for HIV testing for everyone 15 to 65 years old. Younger adolescents and older adults with increased risk should also be tested. This is in line with the 2006 CDC HIV testing recommendations, and is a positive step forward in making HIV screening a routine medical practice.
